EDUCATION

University of Washington, Foster School of Business

Sep 2023 - Mar 2027 (Expected)

Bachelor of Arts in Business Administration | Seattle, WA

Concentrations: Information Systems; Operations & Supply Chain Management

Cumulative GPA: 3.85/4.00 | Dean's List: 9 quarters; Annual Dean's List: 2023-24, 2024-25, 2025-26

Relevant Coursework: Business Data Analytics; Database Management; Application Programming; Statistics; Spreadsheet Models; Managerial Economics; Inventory & Supply Chain Management

Standardized Tests: GRE 333 (Quantitative 170, Verbal 163, Analytical Writing 5.5)

EXPERIENCE

Taizhou Yongzeng Color Printing Co., Ltd.

Aug 2026 - Sep 2026

Business Operations & Digitalization Associate | Taizhou, China

- Coordinated order specifications, quantities, production schedules and delivery milestones for customer orders.
- Noticed that product and order information was scattered across files and slow to look up, which led to my independent knowledge assistant project; also built a website demo to organize product and manufacturing information.

Challenger Trading (Wenzhou) Co., Ltd.

Jul 2026 - Aug 2026

International Trade Data Analyst Intern | Wenzhou, China

- Researched international B2B prospects, competitors and product demand, and helped turn a manual analysis process into a more repeatable workflow.
- Analyzed Alibaba.com customer, product, inquiry and RFQ data in Excel to support product matching, prospect prioritization and follow-up.

Caitong Securities

Aug 2025 - Sep 2025

Business Intern | Taizhou, China

- Researched listed companies and industry trends; cleaned company and market data in Excel for daily market reviews.

SELECTED PROJECTS

Foreign Trade Enterprise Knowledge Assistant | Independent project

Sep 2026

- Built a bilingual assistant that helps export teams find product, policy and past-quotation information, with sources cited.
- Added a review step where staff approve or reject facts, so conflicting documents (e.g., a catalog vs. an old quotation) do not lead to inconsistent answers.
- Tested on 20 held-out questions (synthetic data): on average, 92.5% of relevant sources appeared in the top 5 results.

LLM Price-Performance Analytics | University of Washington, IS 451 team project

Apr 2026 - Jun 2026

- Modeled 299 paid-model observations (from 453 records) with OLS regression in Python to study factors associated with API price; reduced model R-squared 0.575 (adjusted 0.555). The team earned IS 451's Most Trendy Technology Award.

AutoZone Workforce Optimization & Demand Forecasting | UW supply chain team project

Sep 2025 - Dec 2025

- Focused on optimization and forecasting: built an Excel Solver workforce model under mileage-demand and service constraints; modeled about \$142.7K (~15%) in annual labor savings.
- Selected exponential smoothing ($\alpha = 0.75$; 6.3% MAPE) for 2020-2025 freight history and turned 2026-2030 forecasts into staffing and capacity recommendations.

Gen Z Consumer Spending Analytics | University of Washington, IS 445 team project

Mar 2025 - Jun 2025

- Analyzed 1,700 Gen Z consumer records across 15 attributes using SQL, Excel and Python; segmented behavior by income, spending, payment, purchase cadence, seasonality and delivery preference.
- Found near-zero income-spending correlation ($r = 0.03$) and spending above income in 50.6% of sampled Gen Z records; translated findings into product, promotion and fulfillment recommendations.

LEADERSHIP & COMMUNITY

Study Group Organizer & Peer Tutor, University of Washington | Seattle, WA

2025 - Present

- Organized study groups of 3-6 classmates for quantitative methods and economics courses; tutored classmates on Excel.
- Help new international students with course selection, housing and campus procedures.

Volunteer, Duo Duo Yun School for Children with Autism | Ningbo, China

2022 - Present

- Taught English and organized charity bazaars; continued volunteering during university breaks.

Prefect, Hoosac School | Hoosick, NY: helped organize student activities and relayed feedback to faculty

2022 - 2023

SKILLS & ADDITIONAL

Programming & Analytics: Python (pandas, statsmodels), R, SQL, Excel/Solver, RAG

Quantitative Methods: Regression Analysis, Forecasting, Optimization, Data Visualization, Supply Chain Analytics

Languages: Mandarin (native), English (fluent) | **Interests:** basketball, fitness, tech earnings analysis and industry trends
