Expected Mar 2027

Bachelor of Arts in Business Administration | Seattle, WA

Concentrations: Information Systems; Operations & Supply Chain Management

Cumulative GPA: 3.85/4.00

Relevant Coursework: Spreadsheet Models; Inventory & Supply Chain Management; Database Management

EXPERIENCE

Taizhou Yongzeng Color Printing Co., Ltd.

Aug 2026 - Sep 2026

Business Operations & Digitalization Associate | Taizhou, China

- Owned end-to-end order coordination across placement, specification and quantity checks, production schedules, and delivery milestones, keeping execution aligned with customer requirements.
- Led the company website from concept to launch, defining information architecture and product presentation and independently designing and developing a responsive customer-facing site from the ground up.

Challenger Trading (Wenzhou) Co., Ltd.

Jul 2026 - Aug 2026

International Trade Data Analyst Intern | Wenzhou, China

- Evaluated international B2B prospects and export markets across company background, product fit, purchasing signals, competitors, and demand to support lead, product development, and positioning decisions.
- Analyzed Alibaba.com International Station and RFQ/inquiry data in Excel; used AI-assisted research to structure customer and product information for matching and follow-up decisions.

Caitong Securities

Aug 2025 - Sep 2025

Business Intern | Taizhou, China

- Researched listed companies, industry sectors, and market movements; synthesized findings into daily market-review materials.
- Collected, cleaned, and structured company and market data in Excel for recurring analysis and consistent cross-company comparison.

SELECTED PROJECTS

LLM Price-Performance Analytics

Apr 2026 - Jun 2026

UW IS 451 Team Project | Business & Technology Analytics

- Analyzed 453 LLM price and performance records and 299 paid model observations with full and reduced OLS models to assess how capability, release timing, open source status, and provider effects relate to log API price.
- The reduced model reached R^2 0.575 / adjusted R^2 0.555; translated the relationships into a structured view of technology pricing and market positioning.

AutoZone Workforce Optimization & Demand Forecasting

Sep 2025 - Dec 2025

UW Supply Chain Analytics Team Project | Cost Optimization | Capacity Planning

- Built a workforce cost model from AutoZone distribution center data to optimize hiring, training, and staffing while meeting mileage demand; identified approximately \$142.7K in modeled annual labor cost savings.
- Selected exponential smoothing ($\alpha=0.75$, 6.3% MAPE) for 2020-2025 freight weight history and translated 2026-2030 seasonal forecasts into capacity, hiring, and training recommendations.

Gen Z Consumer Spending Analytics

Mar 2025 - Jun 2025

Academic Team Project | Consumer Segmentation | Excel | R

- Segmented two consumer datasets, including 1,700 Gen Z financial records across 15 attributes, by income, product category, payment, shopping cadence, seasonality, and shipping preference.
- Found an income and spending correlation of $r=0.03$ and identified spending above income in 50.6% of sampled Gen Z records; converted cross-generation patterns into product positioning, promotion timing, and delivery strategy recommendations.

TECHNICAL & BUSINESS SKILLS

Business & Analytics: business/market research; Excel Solver—linear & integer programming; SQL/MySQL; Oracle Crystal Ball—Monte Carlo simulation; forecasting, sensitivity analysis, and decision analysis

Digital & AI: Python, Tableau, Streamlit; AI-assisted research, reusable Agent workflows, structured analysis, and business digitalization
